## Technical Information, Flange Sizes

### Nominal Internal Diameters (DN) and Flange Sizes

Cinquepascal uses the internationally accepted system of nominal internal diameters (DN) to identify flange sizes. These correspond with other naming conventions as the following table. The DN convention applies to Copper Gasket Flanges (CF Types) Clamp Flanges (KF) Types, ISO-K, and ISO-F flanges (LF Types). The sizes DN25 and DN50 are not in common use for CF flanges. Additionally there are sizes DN80 (4 5/8"), DN125 (6 3/4") and O.D.s 13 1/4", 14" and 16 1/2". These are available on request.

DN	NW	Typical Tube I.D mm	US Tube Size (O.D.) (inches)	I.D. -Ø (CF) mm	CF Flange O.D. mm	CF Flange O.D. (inches)	KF / ISO-K Flange O.D. mm
<b>DN16</b>	16	16	3/4"	16	34	1 1/3"	30
<b>DN25</b>	25	22	1"	-	-54	(2 1/8")	40
<b>DN40</b>	35	35	1 1/2"	37	70	2 3/4"	55
<b>DN50</b>	50	47	2"	-	-86	(3 3/8")	75
<b>DN63</b>	63	57	2 1/2"	64	114	4 1/2"	95
<b>DN100</b>	100	98	4"	102	150	6"	130
<b>DN160</b>	150	146	6"	153	203	8"	180
<b>DN200</b>	200	197	8"	200	254	10"	240

## Choice of Stainless Steel for UHV

The best choice of stainless steel is the type 316LN (1.4429). It has the lowest magnetic permeability, the best stability after working and good TIG welding characteristics. It also has good corrosion resistance particularly against Chloride compounds. Unfortunately this material is quite expensive and is generally not available in the form of tubes.

The best compromise between price, performance and availability is the close relative 316L(1.4404). This material has very similar properties to 316LN. The good welding characteristics, corrosion resistance and mechanical hardness are very similar. The magnetic permeability can be as low as 1.005.

### Summary of the Composition and Vacuum Properties of Stainless Steels used for UHV.

USA AISI	Europ. EN	C max.	Cr	Ni	Mo	N	Uses and Properties	Suitability for UHV
304	14.301	0,08	18	9	-	-	General Purpose austenitic stainless steel, relatively low cost	Medium
304L	14.306	0,03	18	9	-	-	Extra low C prevents carbide precipitation – suitable for general UHV use	Good
304LN	14.311	0,03	18	9	-	0,18	Improved mechanical properties compared to 304L	Good
316	14.401	0,08	16,6	12	2,5	-	General Purpose but higher corrosion resistance than 304	Very Good
316L	14.404	0,03	16,6	12	2,5	0,1 (max.)	Extra low carbon – good TIG welding properties, highest corrosion resistance especially to Chlorides, low magnetic permeability	Excellent
316LN	1:01:29	0,03	16,6	12	2,5	0,12-0,22	Extra low carbon – good TIG welding properties, highest corrosion resistance especially to Chlorides, magnetic permeability typically less than 1.005 Better mechanical stability than 316L	Excellent
321	14.541	0,08	17,5	9,1	-	-	General Purpose especially for bellows	Good

## Vacuum Specification, Conformance & Terms

### Vacuum-Specification / Operating Temperatures

All UHV Components are specified for a maximum differential pressure of 1 bar and for use in vacuum better than  $1 \times 10^{-10}$  mbar. Components are leak tested for a leak rate less than  $5 \times 10^{-10}$  mbar / l s. Almost all components are bakeable to 200°C, unless otherwise specified in the description.

KF and ISO-K Components are specified for use to  $10^{-8}$  mbar provided that the gasket material can withstand elevated temperatures. Viton is suitable for 150°C. The maximum differential pressure is 1 bar.

Feedthroughs, some of which contain Kovar (a NiFe alloy which has a good match to the thermal extension of Glass and Ceramic) can be used down to -50°C. At lower temperatures, a phase transition occurs which can damage the feedthrough. Special cryogenic feedthroughs are available, please ask the Sales Office for details.

### Conformance of Cinquepascal Components

Cinquepascal CF UHV Components use the internationally accepted copper gasket flange system. They are compatible with the Varian Conflat® and CF or FC types from Vacuum Generators and other manufacturers for sizes up to and including DN200CF. They conform to the Alternate Series of Flanges described in ISO 3669. For sizes over DN200CF, no international standard exists. Please ask Sales Office for advice in this case.

KF types are compatible with Klein Flange types and conform to ISO 1609.

ISO-K & ISO-F types are compatible with LF (Large Flange) types and conform to ISO 2861.

Cinquepascal	16CF	40CF	63CF	100CF	160CF	200CF

### Cinquepascal Vacuum Components Catalogue - Terms and Conditions (Summary)

- All prices are in Euros, ex-works Cinquepascal stores in Milan. Prices can be quoted in Pounds Sterling, US Dollars or other currencies. Please call the Sales Office.
- Prices are for guidance only and are subject to change at any time without notice. Please contact the Sales Office for a firm quotation.
- The prices do not include IVA for Italy, (minimum order is € 120,00).
- Delivery within Italy is free of charge, delivery within the European Union is free of charge for shipments of value € 1000,00, or over. For orders under that amount, the standard delivery charge is € 20,00. This may be greater in some cases for heavy or bulky items.
- Quantity Discounts are available. Please ask for details.
- Cinquepascal Products carry a two year warranty. Wear and Tear and mis-use are excepted.

**N.B. Safety of Electrical Installations:** Cinquepascal offers components for the construction of Vacuum Systems. Some of these components, particularly those designed for use with Voltages of 40V or over can cause injury or death, if incorrectly installed. It is the purchaser's responsibility to ensure that Components are installed correctly and in accordance with current safety regulations by competent persons.

Custom made Feedthrough assemblies are built to order.

Mixed Type Feedthroughs are also available including Sub-D combinations with miniature coaxial SMA types.

Also Sub-D types on other flanges not shown here, including special purpose flanges or direct mounting into the walls of chambers.

Please call Sales Office for a quotation

The Sub-miniature D system comprises (see photo left):

- Air Side Socket (see page 5)
- Feedthrough (this page)
- Vacuum Side Socket and Pins (see pages 5 and 6)
- In-Vacuum Cable (see page 26)

Depending on the application, Cinquepascal offers a wide variety of feedthroughs, sockets, wires and cables.

We offer a comprehensive range

- 9, 15 and 25 Pins on 40CF
- 9 Pins on 25KF
- 50 Pins on 63CF
- 37 Pin Feedthroughs

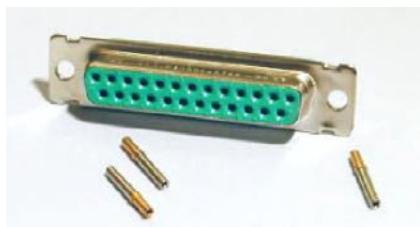

9 Pins on 25KF

- True UHV Feedthrough
- Versions with 9 / 15 / 25 / 37 and 50 Pins
- 500V, max. 5 A per Pin
- Bakeable to 220°C max. gradient 25 K/min (CF) •
- Industry Standard Sub-D Design I to MIL
- Pins do not protrude from the housing
- Sockets for the Vacuum Side are available in HV and UHV types.
- To get the highest possible pin density, use the "Small" Socket connector with the feedthroughs shown in orange

Weldable Versions available to order. Please call Sales Office.

**HV Sockets**

Depending on the application, different types of socket can be used:

- Standard Socket for the Air Side (up to 80°C)
- High Vacuum Socket (glass filled polymer and stainless steel) for max. 110°C, and 10<sup>-8</sup> mbar
- UHV- Socket (Ceramic), max. 300°C (see next page)
- UHV Socket(PEEK), max. 200°C

Please order Pins separately – see Page 6

For High Vacuum applications, Cinquepascal offers fully Nickel plated All Metal Housings with a Strain Relief Clamp for the wires. The Strain Relief can be mounted in 3 positions, straight, to the left or to the right (as shown on the picture).

The SMALL Versions are designed for use when there is no space for the standard types.

Pins	Vacuum	SUB-D SOCKET FEMALE (FOR FEEDTHROUGHS), HIGH VACUUM	Qty.	Part Number	Euro
9	HV	Sub-D Socket, Female, 9 Pins ,	I	211-FS09-HV	93,00
9	HV	Sub-D Socket, Female, 9 Pins, SMALL	I	211-FS09-HV-S	93,00
15	HV	Sub-D Socket, Female, 15 Pins	I	211-FS15-HV	96,00
15	HV	Sub-D Socket, Female, 15 Pins, SMALL	I	211-FS15-HV-S	96,00
25	HV	Sub-D Socket, Female, 25 Pins	I	211-FS25-HV	105,00
25	HV	Sub-D Socket, Female, 25 Pins, SMALL	I	211-FS25-HV-S	105,00
37	HV	Sub-D Socket, Female, 37 Pins	I	211-FS37-HV	121,00
37	HV	Sub-D Socket, Female, 37 Pins, SMALL	I	211-FS37-HV-S	121,00
50	HV	Sub-D Socket, Female, 50 Pins	I	211-FS50-HV	134,00
50	HV	Sub-D Socket, Female, 50 Pins, SMALL	I	211-FS50-HV-S	134,00

**Specification HV-Socket**

- Versions with 9 / 15 / 25 / 37 and 50 Pins
  - Various Pin Types available
  - Dimensions are the same as standard Sub-D types.  
**(SMALL Versions without locking screw holes)**
  - Male Plug and Female Socket Pairs can be used in other applications
- Material Glass filled Polymer, Stainless Steel Housing  
Temperature -55°C ... 110°C  
Vacuum to 10<sup>-8</sup> mbar  
Design one part – Pins can be removed using a special tool

Pins	Vacuum	SUB-D PLUG, MALE, HIGH VACUUM	Qty.	Part Number	Euro
9	HV	Sub-D Plug, Male 9 Pins	I	211-MS09-HV	81,00
15	HV	Sub-D Plug, Male 15 Pins	I	211-MS15-HV	88,00
25	HV	Sub-D Plug, Male 25 Pins	I	211-MS25-HV	90,00
37	HV	Sub-D Plug, Male 37 Pins	I	211-MS37-HV	99,00
50	HV	Sub-D Plug, Male 50 Pins	I	211-MS50-HV	101,00

**Specification Hv-Socket Housing**

HV Plug with Metal Housing

- Material Nickel Plated, Zinc  
Temperature -55°C ... 110°C  
Vacuum to 10<sup>-8</sup> mbar  
Design Stainless Steel screws

The Housings are not suitable for use with the SMALL versions.

Pins	Vacuum	METAL HOUSING FOR HV SUB-D SOCKETS & PLUGS	Qty.	Part Number	Euro
9	HV	Metal Housing Nickel Plated for HV Sub-D Plug & Sockets 9-Pin	I	211-HOUSING-D09	56,00
15	HV	Metal Housing Nickel Plated for HV Sub-D Plug & Sockets 15-Pin	I	211-HOUSING-D15	60,00
25	HV	Metal Housing Nickel Plated for HV Sub-D Plug & Sockets 25-Pin	I	211-HOUSING-D25	63,00

**Specification for All-Metal Housing**

- Material Nickel Plated, Zinc  
Temperature -55°C...110°C  
Vacuum to 10<sup>-8</sup> mbar  
Cable diam. 4-7mm  
(8-10 mm for 50 pin version)  
Housings will fit the female sockets and male plug HV connectors.

Pins	Vacuum	ALL METAL HOUSINGS FOR HV SOCKETS WITH STRAIN RELEIF	Qty.	Part Number	Euro

50	Air	Sub-D Socket, Female, 50 Pins	I	211-FS50-AIR	56,00

Air Side Male Plugs are available at the same price as sockets.

- Wire fixing Solder  
Housing 9 / 15 / 25 pin black Plastic with knurled knob  
37 / 50 pin Metalised Plastic with standard screws

## Sub-D UHV Plugs & Sockets

Cinquepascal Sub-D UHV Sockets are made from Glass Ceramic.

- Impermeable material (does not absorb gas or water vapour).
- Free from Carbon compounds of any sort.
- High Bakeout temperatures – up to 300°C (Glass Ceramic itself can be baked to 700°C). It is also suitable for cryogenic use.

### Specification UHV-Socket

Material	Glass Ceramic, impermeable
Temperature	4K ... 300°C (Incl. Pins)
Vacuum	10 <sup>-11</sup> mbar
Design	2 Part screwed
Included with the UHV Sockets are screws for fixing the socket to the feedthrough.	

The male Plugs include long fastening screws (see photo above left) which enable the Sockets and Plugs to be fixed together as a pair.

**Please order pins separately**

Pins	PLUG MALE	Part Number	Euro
9	Sub-D Plug, male, UHV, for 9 Pins	211-MS09-UHV	218,00
15	Sub-D Plug, male, UHV, for 15 Pins	211-MS15-UHV	248,00
25	Sub-D Plug, male, UHV, for 25 Pins	211-MS25-UHV	260,00
37	Sub-D Plug, male, UHV, for 37 Pins	211-MS37-UHV	293,00
50	Sub-D Plug, male, UHV, for 50 Pins	211-MS50-UHV	303,00

## Sub-D UHV Peek Plugs and Sockets

As an alternative to the Glass-Ceramic types, Cinquepascal offers Plugs and Sockets made from PEEK. PEEK can be used for most High Vacuum and UHV applications.

- High temperature range.
- Low water absorption in air.
- Impact resistant material.
- **Significant price reduction compared to Glass Ceramic.**

### Specification PEEK Plug & Socket

Vacuum	UHV
Temperature	-65 ... +250°C
Thermal conductivity: 0.25 W/m K	

Water absorption in air < 0.1%  
(For UHV applications, bakeout is required).

Fixing screws for the connector and vented fixing screws for the female sockets are included.

The male plugs have connection screws to secure them to the female sockets.

Pins	PLUG MALE	Part Number	Euro
9	Sub-D Socket, male, PEEK Version, 9 Pins	211-MS09-PK	169,00
15	Sub-D Socket, male, PEEK Version, 15 Pins	211-MS15-PK	192,00
25	Sub-D Socket, male, PEEK Version, 25 Pins	211-MS25-PK	201,00
37	Sub-D Socket, male, PEEK Version, 37 Pins	211-MS37-PK	221,00
50	Sub-D Socket, male, PEEK Version, 50 Pins	211-MS50-PK	232,00

## Crimp Pins for HV and UHV Sub-D Sockets & Tools

As well as the Standard Crimp Pins, Cinquepascal offers other versions for special purposes. Call Sales Office for advice on the best choice of pin for your application.

Pin	Cable Ø	Use Crimp Tool	Application
Standard	0.25 – 1 mm	214-CTOOL / 214-CTOOL-HQ	With Stainless Steel Shell, high quality, our standard pin for UHV
B (Budget)	0.25 – 1mm	214-CTOOL / 214-CTOOL-HQ	No stainless steel shell, good value for less demanding applications
S (Small)	0.08 – 0.5mm	214-CTOOL-HQ	As Standard Pin, but for very thin wires- only the "HQ"- Crimp tool is suitable
Thermocouple	0.25 – 0.6mm	214-CTOOL-TC	Type K Thermocouple material Pins, made from Cromel and Alumel .

N.B. For Semiconductor Applications, Nickel Plated Pins are available to order..

Type	PINS, FEMALE FOR SOCKETS	Qty.	Part Number	Euro	Pins (HV and UHV)
Std	Standard Crimp Pins, female for UHV and HV	10	212-PINF-10	53,00	
Std	Standard Crimp Pins, female for UHV and HV	25	212-PINF-25	65,00	
B	Budget Crimp Pins, female for UHV and HV	10	212-PINF-10-B	50,00	
B	Budget Crimp Pins, female for UHV and HV	25	212-PINF-25-B	60,00	
S	"Small" Crimp Pins, female for UHV and HV	10	212-PINF-10-S	54,00	Material      Gold Plated Copper Alloy
S	"Small" Crimp Pins, female for UHV and HV	25	212-PINF-25-S	67,00	Standard Pins: include Stainless Steel Shell

Type	PINS, MALE FOR PLUGS	Qty.	Part Number	Euro	Budget Pins no shell
Std	Crimp Pins for Sub-D Plugs, male, UHV and HV	10	212-PINM-10	48,00	Wire Mount Crimp
Std	Crimp Pins for Sub-D Plugs, male, UHV and HV	25	212-PINM-25	55,00	
S	"Small" Crimp Pins for Sub-D Plugs, male, UHV and HV	10	212-PINM-10-S	49,00	For thin wires of diameters 0.08mm Ø and above, we recommend the „Small“ Version (See Table above)
S	"Small" Crimp Pins for Sub-D Plugs, male, UHV and HV	25	212-PINM-10-S	58,00	<b>Thermocouple Pins - see next page</b>

TOOLS	Qty.	Part Number	Euro	Crimp Tools
Crimp Tool for HV and UHV Sub-D Crimp Pins, no positioner, not suitable for "S"-Versions	1	214-CTOOL	253,00	In order to make secure connections of wires to the Crimp-Pins, the use of the correct Crimp Tool is recommended.
Crimp Tool for HV und UHV Sub-D Crimp Pins, with positioner	1	214-CTOOL-HQ	495,00	See page 6 for details of which Tool to use with which Pin
Crimp Tool (Pliers) for Thermocouple Pins	1	214-CTOOL-TC	66,00	
Demounting Tool for Crimp Pins (for use only with HV Sockets)	1	214-CRIMPINS	67,00	

214-CRIMPINS

214-CTOOL-HQ  
4-Indent Crimp Tool with Positioner

214-CTOOL-TC  
Pliers for Thermocouple Pins

214-CTOOL  
This tool fits all Pin types except Thermocouple - Pins. These should be crimped with Pliers (214-CTOOL-TC),

## Thermocouple Pins, Adaptors & Sockets

Sub-D Feedthroughs may be used as Thermocouple Feedthroughs. In order to do this the standard D Type feedthrough is used but the air and vacuum side Pins are changed to Thermocouple types. These are made from Chromel and Alumel respectively. Although the use of Nickel pin material in contact with the Thermocouple Pins results in the creation of two thermocouple junctions, the measurement error introduced is negligible provided the vacuum side of the feedthrough contacts and their air side are at the same temperature. If required, the Sub-D feedthrough can be used for a mixture of Thermocouple and normal connections by appropriate choice of the Socket Pins. If very accurate temperature measurement is required, the use of a Platinum Resistance Thermometer is recommended.

Type	THERMOCOUPLE PINS FOR SUB-D		Qty.	Part Number	Euro
K	HV + UHV	Thermocouple Crimp Pins for Sub-D Socket, female, Type K, 5 Pairs (Chromel and Alumel)	2x5	213-PINF-K	82,00
K	HV + UHV	Thermocouple Crimp Pins for Sub-D Plug, male, Type K, 5 Pairs (Chromel and Alumel)	2x5	213-PINM-K	82,00

### Thermocouple Pins

 (Air side Thermocouple Housings are available on request)

Pins	ADAPTOR	Qty.	Part Number	Euro
9	Sub-D Adaptor, female to female, for Air Side 9-Pin Feedthrough	1	211-D9-ADAPT	48,00
15	Sub-D Adaptor, female to female, for Air Side 15-Pin Feedthrough	1	211-D15-ADAPT	50,00
25	Sub-D Adaptor, female to female, for Air Side 25-Pin Feedthrough	1	211-D25-ADAPT	51,00
37	Sub-D Adaptor, female to female, for Air Side 37-Pin Feedthrough	1	211-D37-ADAPT	54,00

Wire Stripper

Thermocouple Pins

9-Pin Feedthrough  
with Adaptor fitted

For Wires and Ribbon Cable see Page 26

For finished Sub-D Cable see Page 31

### Demounting Tool 214-CRIMPINS

The Pins click into place in the HV Sockets. If it is required to remove them, the Demounting Tool should be used.

This Tool can also be used to easily insert the Pins into the HV Sockets.

### Adaptor (See Picture left)

The Sub-D Feedthroughs have male Plug type connections both inside and outside. The Adaptor converts the air side Plug into a (female) Socket (see Illustration far left).

To fit Kapton Wire to Sub-D Pins, the use of a Wire Stripper is recommended (see page 30).

## Air Side Thermocouple Sockets

As Sub-D Feedthroughs can also be used for thermocouple readout, we now offer low cost sockets for the air side, which can be used with the Thermocouple Crimp Pins (Our measurements showed a maximum error of 1.2K when using a Sub-D Feedthrough, i.e. within the region of tolerance of a K-Type Thermocouple).

### Specification TC-Socket

Version For Air Side use  
 Temperature 65°C

Housings accept Thermocouple Pins as well as all the other female Crimp Pins

## Choice of Co-axial Types

Co-axial Feedthroughs are well suited for measurement signals. If high frequencies or short pulses are used, the  $50 \Omega$  versions are best.

Type	BNC	BNC50	SMA50	SMB	MHV	SHV	SHV50	N50
	BNC Standard	50 Ohm BNC	50 Ohm SMA	Miniature Type	MHV similar to BNC but 5 kV	"SAVE HIGH VOLTAGE"	50 Ohm SHV	Type N typically used for RF
Max.Volts.	500	1000	1000	500	5000	5 kV-20 kV	6000	3000
Max.Amps	3	3	3	0,5	3	5	3	5
Max. MHz	-	100 *)	6500	-	-	-	100	200
Impedance $\Omega$	-	50	50	-	-	-	50	50
Application	General Purpose	Middle Frequency	High Frequency	Restricted Space	Higher Voltages	High Voltage	Signal at High voltage	RF

\*) Double Sided BNC Feedthroughs are rated to 4 Ghz.

## BNC- Feedthroughs

### Specification BNC

Vacuum	UHV
Temperature	300°C
Max. Voltage	500V*
Max. Current	3A
Impedance	Not Constant except 50 Ohm types
Frequency (50 $\Omega$ )	: to 100MHz standard type, 4GHz double sided type
Pin Diam.	2.4mm
Pin Length	9mm 13mm (50 Ohm)

\*Voltage limited by Connector

All Types are available on  
KF- Flanges

Floating Shield BNC

BNC FEEDTHROUGH – STANDARD			Pins	Part Number	Euro

40CF	DN40CF with 2x BNC Feedthroughs, floating Shield, 50 Ohm, max. 4 GHz, double sided	50 $\Omega$	2	241-BNCF50-C40-2	726,00

## SMA Feedthroughs

COAX FT

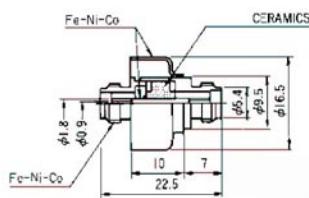

The SMA Co-axial Feedthrough has several advantages over other types:

- Miniature size means up to 4 feedthroughs can be housed on a DN40CF flange
- SMA is available double sided with both internal and external 50 Ohm plugs.
- UHV compatible 50 Ohm Kapton Cable fits to the Vacuum side Sockets
- Vacuum sockets are available in Ceramic or PTFE (Teflon). The latter is best for high frequency performance.
- Floating Shield versions are available.

### SMA Specification

Vacuum	UHV
Temperature	300°C
Max Voltage	1000V
Max Current	3A
Impedance	50 Ohm
Frequency	to 6,5GHz
Ø Weld-	
(242-SMA50)	9.5mm
(242-SMAD/SMADF)	16.5mm

Dimensions of the weldable version 242-SMAD (and 242-SMADF)

Socket Connector for Vacuum

### Socket Connector UHV

Material	Stainless Steel & Cu, Gold Plated
Isolation	PTFE or Glass Ceramic
Max. Temp.	250°C
Wire fixing	solder or crimp
Accessories	- UHV Solder 315-SOLDER - 50 Ohm Cable 311-KAP50

All Feedthroughs are available on KF flanges on request!

A separate data sheet for SMA feedthroughs is available on request. Please call Sales Office.

These can be made up with SMA Sockets at one end or both ends.

**SMB / MHV / SHV & Type-N Feedthroughs****SMB** is the smallest co-axial feedthrough which is available.**MHV** is a variation of the BNC type. The main difference is that it can be used up to 5000V**SHV** (Safe High Voltage) is a modern System for Voltages up to 5 kV, the maximum current rating is higher than the MHV type.**Type-N** is used for RF Signals.General Specification

Vacuum	UHV
Temperature.	300°C

Specification SMB

Max.Voltage	500V
Max. Current	0.5A
Impedance	Not constant
ø weldable:	4,75mm
Pin ø	0.8mm
Cable	RG174A/U

Specification MHV

Max Voltage	5000V / 6000V
Max Current	3A
Impedance	Not Constant
ø Weldable	12.6mm
Pin ø	2.4mm
Cable	RG59B/U

Specification SHV / SHVE

Max.Voltage	5000V
Max. Current	5A
Impedance	Not Constant
ø Weldable	12.6mm
Pin ø	2.4mm
Cable	RG59B/U
- 241-SHV-C16 see photo above right-	

Specification Type-N

Max Voltage	3000V
Max. Current	5A
Impedance	50 Ohm, to 200MHz
ø Weldable	12.6mm
Pin ø	2.4mm
Cable	RG213 / RG214/U

Type N Feedthrough

All Feedthroughs are complete with Air Side Socket Connector

## 20 kV Co-axial Feedthroughs and 5 kV Triaxial

The SHV-20 High Voltage Feedthrough offers a safe air side connection for high voltage signals.

Two distinct types are offered. The standard type has the high voltage insulator within the body of the feedthrough while the extended type has the ceramic exposed on the vacuum side.

For sensitive signals the Triaxial-Feedthrough can be used. The Triaxial feedthrough is doubly shielded. The inner shield is isolated from both the conductor and the system ground. The outer shield is connected to system ground.

SHV HIGHVOLTAGE 20 kV FEEDTHROUGHS		A	B	Pins	Part Number	Euro

Shielding Ø 17.3mm  
Weld Ø 32.6mm  
Socket included  
Matching Cable RG11A/U

We offer a matching 50 Ohm Vacuum-Cable for these feedthroughs – see Page 29

All feedthroughs are available on KF or other flange types on request. Special Flanges with multiples or mixed types are built to customer's order.

Please call Sales Office.

## CM (Circular Miniature) Feedthroughs

A new series of Feedthroughs has been developed by Cinquepascal. Circular Miniature (CM)-Feedthroughs have 12 or 19 pins on a CF16 Mini Flange. A high quality fully shielded screw connector on the air side and a PEEK connector with optional shielding and strain relief on the vacuum side give a complete solution. CM series are compatible with industry standard air side connectors.

### 12- and 19-Pin Feedthrough

Vacuum	UHV
Temperature	230°C
Max. Voltage	500V*
Max. Current / pin	3A
Max. Current all pins loaded	20A

### Air Side Socket

All Sockets are fully shielded with gold plated contacts. A cable clamp for strain relief is included.

### Vacuum Side Socket

Pin diameter 1mm  
max. cable diameter 0,6mm  
max. total Ø of cable 6mm  
Crimp Pins (12/19 off) are included

### Set

The set contains:

- Feedthrough on DN16CF
- Air Side straight Socket
- Vacuum Side Socket
- Crimp Pins (12 or 20 off)

### Additional products:

Air Side Cable, 12x0.14mm<sup>2</sup>, shielded  
314-CAB12-AIR € 50,00/m  
Air Side Cable, 20x0.214mm<sup>2</sup>, shielded  
314-CAB20-AIR € 52,00/m  
Both cables are twisted pair versions.

Additonal Crimp pins for Vacuum Side

Pack of 10:  
220-CM-PINF-10 € 58,00  
Pack of 20:  
220-CM-PINF-20 € 72,00

### - Ready made cables on request -

For the vacuum side we propose the use of Ribbon Cable:  
 - 15 way for 12 pin  
 - 15 way + 4 way for 19 pin

16CF SETS		Part Number	Euro

19	19-pin Socket, straight, with Housing	220-CON19-SR	282,00

## Dual in Line (DIL) Feedthroughs

A new, ultra-compact signal feedthrough is now available. This has a high density 2x2mm pitch and 40 pins with 0.5mm diameter.

- Ideal to fix electronic boards direct to flange
- Cost effective way for high pin requirements
- Weldables available on request.

Flange DUAL INLINE(DIL) F/T	Pins	Part Number	Euro
63CF 1x 40 pin f/t on DN63CF Flange	40	230-DIL40M-C63	661,00
63CF 2x 40 pin f/t on DN63CF Flange	80	230-DIL40M-C63-2	1081,00

## Braid

High quality Nickel plated Copper Braid is offered in two basic dimensions. Copper gives much better shielding than S/S Braid. The braid comes with a plastic insert for simple and easy use.

BRAID	Length	Part Number	Euro
3 mm	1m	640-QAD63	55,00
4 mm	1m	640-QAD100	58,00

Please note: If the ID of the Braid is increased, the length is reduced accordingly.

## Power Feedthroughs 500 V to 1 kV up to 15 A

A wide variety of Power Feedthroughs are available with Voltage Ratings from 500V to 100 kV for currents from mA to 1.000 A. On the following pages the types are sorted by Voltage rating . Special High Current types (>30 A) are on page 18 For High Voltage types see Page 19.

The 500V versions are very small. As standard for these 500V miniature types, we offer Molybdenum Conductors These have a current rating up to 10 A. 1 kV types have as standard Copper Conductors. Stainless Steel and Nickel Conductors are available on request for all types.

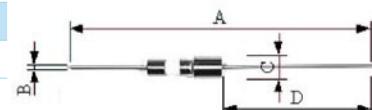

Pins	500V WELDABLE	A	B	C	D	Part Number	Euro	Specification 500V Miniature Types
1	500V 10 A, Mo-Pin 0.8 mm	53	0,8	3,9	25	261-010MO500	79,00	Pin-Material Molybdenum
2	500V 10 A, Mo-Pin 0.8 mm, 2 Pins	64	0,8	12,6	40	261-010MO500-2	118,00	Weld Adaptor Stainless Steel
4	500V 10 A, Mo-Pin 0.8 mm, 4 Pins	64	0,8	12,6	40	261-010MO500-4	131,00	Max.Voltage: 500V
8	500V 10 A, Mo-Pin 0.8 mm, 8 Pins	64	0,8	19	40	261-010MO500-8	169,00	Max. Current 10 A Conductor Ø 0.8 mm

Pins	500V CF FLANGE	A	B	C	D	Part Number	Euro
1	Feedthrough 500V 10 A, Mo-Pin 0.8 mm, DN16CF Flange	53	0,8	-	25	261-010MO500-C16	153,00

8	1 kV 15 A, Kovar-Pin 1.3 mm, 8 Pins	102	1,3	19	48	261-015CUIK-8	195,00

Pins	1 kV CF FLANGE	A	B	C	D	Part Number	Euro
1	DN16CF Feedthrough, 1 Pin, 1 kV 15 A, Cu-Pin 1.3 mm	83	1,3	-	56	261-015CUIK-C16	144,00
2	DN16CF Feedthrough, 2 Pins, 1 kV 15 A, Cu-Pin 1.3 mm	102	1,3	-	35	261-015CUIK-C16-2	156,00
4	DN16CF Feedthrough, 4 Pins, 1 kV 15 A, Cu-Pin 1.3 mm	102	1,3	-	35	261-015CUIK-4-C16	176,00
8	DN16CF Feedthrough, 8 Pins, 1 kV 15 A, Kovar-Pin 1.3 mm	133	1,3	-	89	261-015CUIK-8-C16	221,00

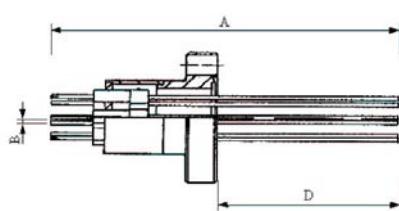

N.B.: Molybdenum is hard and brittle. Great care is needed if the conductor is to be shortened . Short conductors are available to order.

Specification 1 kV Types

Pin-Material	Copper (Nickel and SS optional)
8-Pin Version with Kovar-Pins	
Weld adaptor	Stainless Steel
Max.Voltage	1 kV
Max Current	15 A (Cu)
Conductor Ø	1.3 mm

These feedthroughs are also available on DN40CF /25KF/40KF or 1" base plate flanges

### Socket Connectors

500V: Crimp contacts for 0.75/ 0.8mm can be used (see Page 27) Alternatively the Sub-D Pins crimp can be directly crimped to the feedthrough pins (See Page 6).

For 1 kV: versions, crimp contacts are available in addition to screw contacts. See Page 27 for details.

## Power Feedthroughs 3 kV to 10 kV, up to 30 A

Cinquepascal offers Power Feedthroughs, flanged and unflanged from 3 to 10 kV with current capacity up to 30 A Custom fabrications with several Feedthroughs on one flange to order. Choice of Conductor materials: Copper (Cu), Nickel (Ni), Stainless Steel (SS), Alumel or Nickel -Molybdenum alloy (Ni-Mo).

### WELD VERSION SINGLE PIN

kV	A	Pin Mat.	Pin Ø	C	A	D	Part Number	Euro

All Types are available with KF flanges, Please call Sales Office for prices.

**Feedthroughs with Single Boot Socket 5 kV-40 kV**

Single Boot Sockets provide a component for the construction of safe and convenient high voltage feedthrough assemblies.

N.B. All high voltage sockets and feedthroughs must be carefully installed in accordance with current safety regulations. If multiple feedthroughs are used, care must be taken that one Boot Socket cannot be removed alone.

Cinquepascal offers Single Boot Sockets for 5 kV, 20 kV and 40 kV

## High Current Feedthroughs 40 A – 1000 A (3-20 kV)

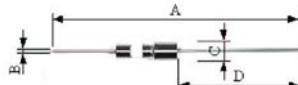

High current Feedthroughs are typically used for heaters and furnaces. These feedthroughs are also used for applications such as Electron Beam Evaporation Sources. We offer a range of high current feedthroughs with weld adaptors, CF flanges or other flanges including KF types on request.

Specification	
Pin-Material	Copper, Nickel Stainless Steel on request
Weld Adaptor	Stainless Steel
Max.Volts	3 kV – 20 kV DC
Max. Current with Cu conductor	4mm 75A 6.35mm 150A 9.6mm 250A 19mm 600A

Water Cooled 1000A Feedthrough

Max. Current	1000A
Pin-Material	Copper
Water Connection	1/4" (6.35mm) Swagelock

The Water Connection is held at high voltage. Therefore the water pipe work must be constructed from insulating material such as plastic.

All Feedthroughs can be delivered on KF or other flange types. Also mixed combinations on various flanges are possible. Please call Sales Office for details

## High Voltage Feedthroughs 20 kV – 100 kV

### Tube Feedthroughs

High Voltage Feedthroughs are offered in ratings up to 100 kV.

High Voltage Feedthroughs are not build for high currents as high voltage and high current are typically not used together.

Tube Feedthroughs are suitable for liquid cooling applications and High Voltages where higher currents are necessary.

#### High Voltage Feedthroughs

Pin-Material	Copper, Ni and Stainless Steel( SS)
Weld Adaptor	Stainless Steel
Max.Volts	5 kV – 30 kV DC
Max. Current (Cu-conductor)	
2.4mm	30A
4mm	75A
6.53mm	150A

Versions with 2 or 3 Pins are typically used for filament power supplies.

For multi-pin versions, the maximum voltage between pins is 3 kV

#### Tube Feedthrough

Max.Volts	5 kV
Tube Diameter	1/4" = 6.35mm (9.6mm or 19mm to order)
Wall Thickness	0.8mm

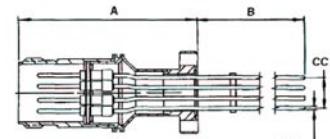

Maximum Current Ratings are not specified for Tube Feedthroughs. If cooling liquid is used, very high currents can be passed.

## Multi-Way Feedthroughs with MS Socket

- Multi-pin Feedthroughs with MS (screwed) connection on the air side.
- Double Ended Versions with vacuum compatible connector on the vacuum side.
- CF and Weldable Versions, KFTypes available to order.

Specification

Max.Voltage 700V (limited by the  
Socket, Feedthrough to 2 kV)

Max. Current 10A / Pin max.

Temperature 450°C  
(Socket 125°C)

Pin-Material Alumel  
Pin ø 1.4mm

A ceramic disc on the vacuum  
side protects the pin positions.

### Double Sided Feedthroughs

Max.Voltage 700V  
Max. Current 10A / Pin max.  
Temperature 400°C, incl.  
Vacuum-Socket (Air Side Socket 125°C)

Pin-Material Alumel  
Pin ø 1.4mm

Maximum total current shared  
by all pins at once

4 Pins	28A
6 Pins	36A
10 Pins	50A
20 Pins	75A
35 Pins	100A

Additional Sockets are available  
to order.

### Vacuum Side Connections

The Crimp-Pins 360-CRIMP-1.3,  
can be directly fitted to the va-  
cuum side of the feedthroughs.  
See Page 30

360-PPO-1.3 and 360-PIC-  
1.8 can also be used in some  
cases but not where space is  
restricted.

7 DN40CF, 7.5A, 12 kV, with air side socket	267-075HV12K-C40-7	680,00

D = Diameter of the Weld Adaptor

All Types are available on KF / ISO-K Flanges. Connections for the Vacuum side – See Page 30

## Thermocouple Feedthroughs Type K, N, C

Overview of the various Thermocouple Types

Type	Material	Temp. °C	Description
K	+ Chromel® - Alumel®	-200 ... 1250	Most Common Type, Alumel is magnetic, Socket Yellow (ANSI)
C	+ W5%Re - W26%Re	0 ... 2320	Feedthrough made from Extension Grade Material
N	+ Nicrosil - Nisil	-250 ... 1300	New Type, Best General Purpose Type, Socket pink (IEC)
E	+ Chromel® - Constantan®	-200 ... 900	High Temperature Socket violet
J	+ Iron - Constantan®	0 ... 750	Socket Black
T	+ Copper - Constantan®	-200 ... 350	Socket Blue (ANSI)
R	+ Pt13%Rh - Pt	0 ... 1450	Feedthrough made from Extension Material
S	+ Pt10%Rh - Pt	0 ... 1450	Feedthrough made from Extension Material

Extension Grade Material has the same thermo-electric characteristics as the original material up to 250° C

® Chromel, Alumel and Constantan are registered trade marks (see page 3)

The most common types used in UHV and High Vacuum are listed on this page: Type K, Type C and the new Type N

### Specification Type K

Temp. Range -200°C - +1250°C  
+ Pole Chromel  
- Pole Alumel (magnetic)

### Specification Type N

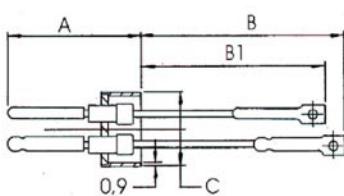

Temp. Range -250 °C... 1300°C  
+ Pole Nicrosil  
- Pole Nisil

### Specification Type C

Temp. Range 0°C ... 2320°C  
(0°C... 250°C for Extension Material)  
+ Pole W5%Re  
- Pole W26%

ReExtension Grade Material which has the same thermo-electric properties is used to manufacture these feedthroughs

Not suitable for oxidising atmospheres

(B1 = B-25mm)

On the Vacuum Side, the + Pole is 25 mm longer than the - Pole

Pairs	TYPE K WELDABLE VERSIONS	A	B	C	Part Number	Euro
1	1 Pair Type K, Weldable Version	33	114	19	262-TCK-1	140,00

5	5 Pairs Type K, Weldable Version	64	114	19	262-TCK-5	595,00

Pairs	TYPE K CF VERSIONS	A	B	C	Part Number	Euro
1	DN16CF Feedthrough Type K, 1 Pair	47	101	-	262-TCK-1-C16	179,00
2	DN16CF Feedthrough Type K, 2 Pairs	67	101	-	262-TCK-2-C16	265,00
2	DN40CF Feedthrough Type K, 2 Pairs	55	113	-	262-TCK-2-C40	313,00
3	DN16CF Feedthrough Type K, 3 Pairs	71	101	-	262-TCK-3-C16	391,00
3	DN40CF Feedthrough Type K, 3 Pairs	58	115	-	262-TCK-3-C40	454,00
4	DN40CF Feedthrough Type K, 4 Pairs	50	100	-	262-TCK-4-C40	587,00
5	DN40CF Feedthrough Type K, 5 Pairs	57	100	-	262-TCK-5-C40	711,00

Pairs	TYPE N WELDABLE VERSIONS	A	B	C	Part Number	Euro
1	1 Pair Type N, Weldable Version	33	114	19	262-TCN-1	140,00
2	2 Pairs Type N, Weldable Version	54	114	19	262-TCN-2	220,00
Pairs	TYPE N CF VERSIONS	A	B	C	Part Number	Euro
1	DN16CF Feedthrough Type N, 1 Pair	47	101	-	262-TCN-1-C16	179,00
2	DN16CF Feedthrough Type N, 2 Pairs	67	101	-	262-TCN-2-C16	265,00

Pairs	TYPE C WELDABLE VERSIONS	A	B	C	Part Number	Euro
1	1 Pair, Type C, Weldable Version	33	114	19	262-TCC-1	140,00
2	2 Pairs, Type C, Weldable Version	54	114	19	262-TCC-2	220,00

Pairs	TYPE C CF VERSIONS	A	B	C	Part Number	Euro
1	DN16CF Feedthrough Type C, 1 Pair	47	101	-	262-TCC-1-C16	179,00
2	DN16CF Feedthrough Type C, 2 Pairs	67	101	-	262-TCC-2-C16	265,00

Thermocouples Type K / N / C / E / J are available as weldables in 1 - 5 Pairs. Additionally they are available on CF or KF flanges at the same prices as the K types						
Kapton isolated Thermocouple Wire – see Page 26						

## Thermocouple Feedthroughs Type E, J, T, R and S

Type E and J Feedthroughs with Socket Connectors.

All these Thermocouple Feedthroughs are available in the same variety of types as the Type K ( previous page).

Type R, S and T with air side screw connectors.

### Specification Type E

Temp. Range	-200°C ... +900°C
+ Pole	Chromel
- Pole	Constantan

### Specification Type J

Temp. Range	0 ... 750°C
+ Pol	Iron
- Pol	Constantan

### Specification Type R

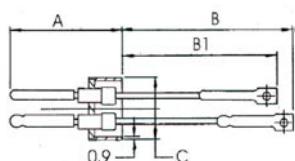

Temp. Range	0 ... 1450°C (0... 250°C for Extension Material)
+ Pole	Pt13%Rh
- Pole	Pt

### Specification Type S

Temp. Range	0 ... 1450°C (0... 250°C for Extension Material)
+ Pole	Pt10%Rh
- Pole	Pt

### Specification Type T

Temp. Range	-200 ... 350°C
+ Pole	Copper
- Pole	Constantan

The + Pole is 25mm longer on the Vacuum Side than the - Pole

Thermocouple Wire can be found on Page 29. A full range of Kapton and Teflon isolated Versions is offered.

### TYPES E / J / R / S / T WELDABLE VERSION

	A	B	C	Part Number	Euro	
E	Thermocouple Feedthrough Type E, I Pair, Weldable Version with Socket	33	114	19	262-TCE-I	140,00
J	Thermocouple Feedthrough Type J, I Pair, Weldable Version with Socket	33	114	19	262-TCJ-I	140,00
R/S	Thermocouple Feedthrough Type R/S, I Pair, Weldable with Screw Connectors	44	114	19	262-TCR-I	153,00
T	Thermocouple Feedthrough Type T, I Pair, Weldable with Screw Connectors	44	114	19	262-TCT-I	153,00

### Type E / J / R / S / T ON DN16CF FLANGE

	A	B	C	Part Number	Euro	
E	DN16CF Thermocouple Feedthrough Type E, I Pair with Socket Connector	33	114	-	262-TCE-I-C16	179,00
J	DN16CF Thermocouple Feedthrough Type E, I Pair with Socket Connector	33	114	-	262-TCJ-I-C16	179,00
R/S	DN16CF Thermocouple Feedthrough Type R/S, I Pair, with Screw Connector	53	101	-	262-TCR-I-C16	192,00
T	DN16CF Thermocouple Feedthrough Type T, I Pair, with Screw Connector	53	101	-	262-TCT-I-C16	192,00

### HIGH TEMPERATURE SOCKETS

	Part Number	Euro	
K	Thermocouple Socket . 650°C, K-Type	265-TC-CON-K-HT	66,00
C	Thermocouple Socket . 650°C, C-Type	265-TC-CON-C-HT	66,00
N	Thermocouple Socket . 650°C, N-Type	265-TC-CON-N-HT	77,00

Type R and Type S use the same Extension Material, so the same Feedthrough is used for both types.

The standard Plastic Thermocouple Socket is bakeable to 120°C. For High Temperature applications, Ceramic Thermocouple Sockets (see table above) are available. These can be used up to 650°C. These High Temperature Ceramic Sockets are also suitable for use in Vacuum.

Thermocouples Type E / J / R / S / T are available in 1 - 5 Pair versions as Weldables or on CF or KF Flanges.

The details are similar to those types shown on page 21.

**Combination Thermocouple - Power Feedthroughs - Weldable**

Type Mat.	POWER (x2), T/C TYPE K	Pins*	V	I	Part Number	Euro

\* Power Pins / TC pairs

All K and C Type Thermocouple Feedthroughs are supplied complete with Thermocouple Sockets. Socket Connectors for Power Pins are listed on Page 30.

Specification (DN40CF)

Conductor	Cu
	2.4 / 4 / 6.35mm
Max. Current (I)	30 A and 60 A versions have 3 Power Pins 150 A versions have 2 Power Pins
40CF	1 or 2 Thermocouples

The + Pole of the Thermocouple is 25 mm longer on the vacuum side

Other Combinations not shown here can be built to order

N.B. If it is necessary to shorten the conductor, care must be taken. The ceramic to metal bond is fragile and sensitive to knocks. The conductor should be held firmly on either side of the cut. Cinquepascal can supply feedthroughs with shortened conductors to order.

## Thermocouple Feedthroughs with MS Sockets

The MS Circular Connector provides a method of safe and secure connection for several thermocouple pairs in one feedthrough. The MS series can accommodate up to 10 pairs on one flange.

Double Sided versions are available. They have air and vacuum side socket connectors. The vacuum side one is fully bakeable.

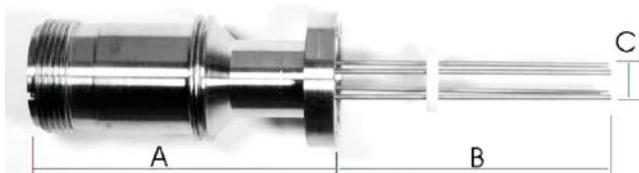

These feedthroughs can be used to carry mixed power and thermocouple combinations.

Double Sided Version

<b>Pairs</b>	<b>MST/C FEEDTHROUGH TYPE K CF FLANGE</b>					<b>Euro</b>	<b>Specification</b>

Thermocouple-Crimp-Pins for these Feedthroughs are listed on page 29

As an alternative to the MS Series, Sub-D Feedthroughs can be used with Thermocouple, Pins for Type K Thermocouples. See Page 8 for details.

MS Series Thermocouple Feedthroughs can be used either wholly or partly as Power Feedthroughs Max. Current per Pin: 10A Max. Voltage: 700V

## Ceramic Breaks and Isolators

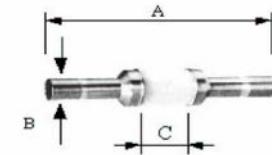

- Small Tube Size Breaks for Gas and Liquid lines
  - Cryogenic versions for use with Liquid Nitrogen
  - Large sizes for System Isolation
- N.B. If using Ceramic Breaks to join two Vacuum Systems while maintaining electrical isolation, the use of a bellows in addition to the Break is recommended.

Stand-offs for mounting high voltage items are suitable for use in air or vacuum. (In air the Maximum Voltage rating should be reduced by a factor of 2.5)

## Kapton Wire Overview

For many years the Caburn UHV® type of Kapton® wire has been in use in UHV Systems. Cinquepascal offers these original types and a wide range of new Kapton Wire Types for use in UHV and High Vacuum. These include:

- Single Strand Dipped Kapton Wire
- Highly Flexible Multi Strand Types
- Co-axial Wires including 50 ohms type
- Shielded Twisted Pairs and Ribbon Cable

Type	Construction	Ø Cond. mm	Ø max. mm	V max Vac V DC <sup>1)</sup>	I max A <sup>2)</sup>	Leiter Fläche mm <sup>2</sup>	R ) Ohm/ km <sup>3)</sup>	Application Examples
3II-KAP-010	Bare Copper Wire Dipped Kapton	0,1	0,28	2.000	0,1	0,01	2270	Suitable for STM / SPM

3II-RIB- 10/15	Ribbon Cable ,10 and 15 Way Compact	0,35	0,5	1.000	1	0,08	225	Sub-D Connections, General Purpose

Wires and Cables are supplied on convenient Spools in 5m or 10m.lengths. Ribbon Cables are sold per meter. Special lengths including 100m Spools can be supplied to order.

1) Maximum Voltage in air is much lower than the vacuum rating. For air use, this data does not apply. In vacuum, these figures are conservative and may be exceeded in normal circumstances. They are rated for pressures of  $<10^{-3}$  mbar.

2) The maximum current in vacuum depends on the degree of temperature rise which is acceptable. If the wire is wound into a coil, the maximum Current Rating should be reduced to 1/3.

3) Calculated values of resistivity for Cu with 56 S m /mm<sup>2</sup> at 20°C.

**Kapton Wires, Co-axial and Ribbon Cable**

Characteristics of Kapton:	Copper Wire	Silver Plated Wire, Ribbon, Coax
Dielectric Constant (1kHz)	~3.5	~3.1
Disruptive Strength (dry) kV/mm	>135	>135
Temperature Range	4K....300°C	4K ... 260°C
Radiation Resistance	10 <sup>9</sup> Rad = 10 <sup>7</sup> Gy	10 <sup>7</sup> Rad = 10 <sup>5</sup> Gy (non-flexing applications)

COAXIAL KAPTON CABLE		Ø	V	Length	Part Number	Euro	
Coax	Highly flexible Kapton Coax Cable, Multi-strand, 19x 0.12mm, 600V, Conductor and Shield Silver Plated	0,6/1,4	1 kV	10m	311-KAPM-060-COAX	176,00	
Coax	Highly flexible Kapton Coax Cable, Multi-strand 7x 0.08mm, Shielded, Shield not insulated	0,25/0,9	1 kV	10m	311-KAPM-025-SHIELD	146,00	
50	50 Ohm Coaxial-Kapton Cable, 5m long	2,3	5 kV	5m	311-KAP50	190,00	
50	50 Ohm Coaxial-Kapton Cable, 1m long	2,3	5 kV	1m	311-KAP50-1	89,00	
MINIATURE COAXIAL CABLE		Ø	V	Length	Part Number	Euro	
50 Ω MINI	50 Ohm Coaxial-Kapton Wire, 1.4mmø, 7x0.08mm, similar to RG178	1,4	5 kV	1m	311-KAP50S-1m	90,00	Highest Frequency ~17 GHz (Measured with SMA Socket)
				5m	311-KAP50S	193,00	
TWISTED PAIR, SHIELDED		Ø	V	Length	Part Number	Euro	
1 Pair	Twisted Pair Coax Cable, 2 Multistrand Wires 19x 0.1mm, Conductor and Shield Silver Plated	0,6/1,6	1 kV	5m	311-KAPM-060-PAIR1	151,00	
2 Pairs	Twisted Pair Coax Cable, 4 Multistrand Wires 19x 0.1mm, Conductor and Shield Silver Plated	0,6/2,2	1 kV	5m	311-KAPM-060-PAIR2	210,00	

**Kapton Wire**  
Ideal for flexible wiring.  
Temp. Range 4K ... 300°C  
(KAP1 and KAP2  
max.260°C)

**KAPTON-Multi-strand wire**  
Higher Flexibility make these wires ideal for movement in vacuum applications, e.g. UHV Manipulators.  
Temp. Range 4K ... 260°C

**Twisted Pairs**

**Wire** 311-KAPM-060Type Coloured Kapton or 2 Pairs, Shielded  
Twisted Pair Coax are ideal for limit switches or current wires for Stepper Motors, to prevent cross talk in the vacuum chamber

**50 Ohm Cable**  
Impedance 50 Ohm +/-10%  
Capacitance 115 pF/m  
Damping 0,1 db/m 100MHz  
1,1 db/m 500MHz  
1,9 db/m 1GHz

Highest Frequency ~17 GHz (Measured with SMA Socket)

**50 Ohm Miniature Cable**  
Impedance ~ 50 Ohm +/-10%  
Capacitance ~ 120 pF/m  
Damping ~ 3 db/m 1GHz

**Ribbon Cable**  
Ribbon Cable is very useful for the Vacuum Side connections to Sub-D feedthroughs, allowing convenient wiring and easy signal identification

KAPTON RIBBON CABLE		V	Length	Part Number	Euro
4 Way	4-way, 7x 0.12mm, 1kV, Silver plated Copper	1 kV	1m	311-KAP-RIB4-1000	85,00
10 Way	10 way, 7x 0.12mm, 1kV, Silver Plated Copper	1 kV	1m	311-KAP-RIB10-1000	120,00
15 Way	15 way, 7x 0.12mm, 1kV, Silver Plated Copper	1 kV	1m	311-KAP-RIB15-1000	158,00
25 Way	25 way, 7x 0.12mm, 1kV, Silver Plated Copper; (one 15 way + one 10way)	1 kV	1m	311-KAP-RIB25-1000	207,00

## Thermocouples / PT-100 Sensors / Thin Constantan® Wire / PEEK® Material

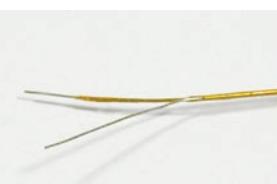

- Thermocouple Type K with Kapton and Teflon Isolation
- Suitable for use to 260°C and 220°C respectively.

These temperatures must not be exceeded. When the Thermocouple is being used to measure higher temperatures, bare thermocouple wire should be used in the vacuum.

The new type N thermocouple is now available with Kapton Isolation. This type is recommended for general use. It has a wider temperature range and better stability than the popular type K. The Thermocouple Type C, R and S are relatively expensive because they contain noble metals.

For high accuracy measurements, PT100 Sensor Resistors are used as standard. Special UHV compatible versions (ceramic & glass) are offered.

Ready made Sensors have 4-wire connection as standard, other connections on request.

Kapton isolated Thermocouple

### Thermocouples Kapton isolated

Diameter	2x0.25mm
Conductor ø	2 layers of Kapton
Isolation + Pole	Bare
- Pole	Kapton Isolated (For Type K the – Pole is magnetic.)

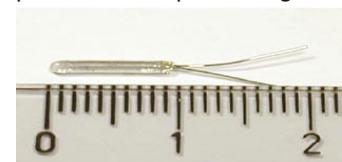

Both wires are isolated additionally with Kapton.

### Thermocouple, PTFE isolated

Diameter	~1.4 x 2.5 mm
Conductor	Ribbon Cable ø 0.5mm

### Bare Wire

Bare Thermocouple Wires can be delivered in any required length. The prices shown are per unit length.

PT-100 Sensor Resistor, Glass

### Version

Temp. range -200...450°C

Accuracy	Class B (0,30 + 0,005 * t)
Dim.	1.3mm ø x 10mm

Wire lengths ~10mm

### PT-100 Sensor Resistor, Ceramic Version

Temp. range -70...500°C

Accuracy	Class 1/3 B (0,10 + 0,005 * t)
Dim.	2.3mm x 2.1mm

Wire lengths ~10mm

Please note: The connection area from the Kapton Wires to the Resistors must not exceed 280°C.

### Constantan-Wire

Very fine wire with poor thermal conductivity. Suitable for use at very low temperatures in applications such as STM/ SPM . Can be crimped to Sub-D Crimp Sockets

Diameter	0.08mm Conductor 0.24mm Overall
Isolation	PTFE (Teflon)

### PEEK

Poly-Ether-Ether-Keton ( PEEK ) is an UHV compatible Polymer. It is bakeable to 250°C. It is machinable with the correct tools but care is needed because it is brittle. Cinquepascal is pleased to quote for machined PEEK parts.

\*) Multiples of 1m can be delivered in one piece

The Socket PPO can be bored out to accept larger wire diameters. However, care must be taken when drilling CuBe-which should not be allowed to come into contact with skin.

## Heaters, Tools

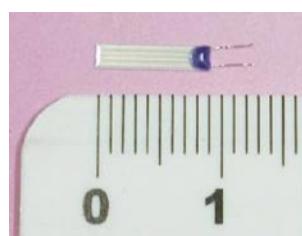

- Kapton Heaters for Vacuum
- Miniature Heaters for Vacuum
- Tools for Crimping and Wire Stripping

Kapton Heater

KAPTON HEATER FOILS -200°C... +200°C	Part Number	Euro
HV Kapton Heater Foil, 25.4 x 25.4mm ca. 78 Ohm, max. 30W	317-KAPH-1/I	134,00
HV Kapton Heater Foil, 25.4 x 50.8mm ca. 185 Ohm, max. 60W	317-KAPH-1/2	153,00
HV Kapton Heater Foil, 50.8 x 50.8mm ca. 39 Ohm, max. 110W	317-KAPH-2/2	139,00
HV Kapton Heater Foil, 102 x 102mm ca. 43 Ohm, max. 490W	317-KAPH-4/4	240,00

MINIATURE HEATER	Part Number	Euro
UHV Ceramic Heater -40°...500°C, 9.5 x 2mm, 6.8 Ohm, max. 2A	343-HEATER-2x10	96,00

Resistance	6.8 at 0°C
I max	2A
U max	3.5V
P max	27W

KAPTON WIRE STRIPPER	Part Number	Euro
Precision Stripper for 0.12 - 0.4mm adjustable in 6 Steps (AWG 36 - 26)	321-STRIP04	89,00
Precision Stripper for 0.3 - 1.0mm, adjustable in 6 Steps 28 - 18)	321-STRIP10	89,00

The Types of Crimp Tools:

214-CTOOL 214-CTOOL-HQ 214-CTOOL-TC 214-CTOOL-SMA

CRIMP TOOLS	Part Number	Euro
4-Chuck Crimp Tool	214-CTOOL	253,00
4 Pin Crimp Tool with Positioner	214-CTOOL-HQ	495,00
Simple Crimp Pliers	214-CTOOL-TC	66,00
Crimp Tool for the Outer Conductor of SMA Sockets	321-CTOOL-SMA	274,00

### KAPTON-Heater Foil

Suitable for Preparation Chamber and Low Temperature Applications.

Thin flexible foil with PTFE connections 300mm long.

Vacuum to 10<sup>-9</sup> mbar  
Temperature -200°C... 200°C

### Miniature Heater

Temperature -40°C... 500°C

Material Al2O3 Pt, Glass

Size 1.9 x 9.5mm

Thickness < 0.2mm (Glass  
End typically.  
0.4mm)

Connections 0.1mm Pt-Wire  
~3.5mm long

### Kapton Wire Strippers

Recommended for Stripping Kapton Wire, Two sizes available.

For very thin wires, the use of KAPEX solvent paste is recommended.

### Crimp Tools

For Crimp Contacts from 0.5 / 0.75 / 1 / 1.4 / and 2.4mm Diameter.

Refer to table below for correct choice of tool or call Sales Office for advice.

Crimp Contact	Tool	Comments
Sub-D 1.0mm	214-CTOOL-HQ/ 214-CTOOL	also suitable for thin wires and, "S"-Version Pins
Sub-D Thermocouple	214-CTOOL-TC	For open contacts
0.5mm	214-CTOOL-HQ /214-CTOOL	
0.75mm	214-CTOOL-HQ /214-CTOOL	
1.4mm	214-CTOOL/214-CTOOL-HQ	The Positioner must be used with the HQ type.
2.4mm	214-CTOOL	
SMA	321-CTOOL-SMA	RG174 / Kapton 50 Cable

## Vacuum Ready Cables

Cinquepascal offers a full range of Vacuum Ready Cables including both standard types and Cables made to customer's specification. The standard cable lengths are 0.5m and 1m. Other lengths are available on request.

### SMA Cable

Fits to double sided SMA Feedthroughs

Impedance 50 Ω

Damping 0.1 dB/m 100MHz  
1.1 dB/m 500MHz  
1.9 dB/m 1GHz

Cut-off frequency~17 GHz  
(measured with 2x SMA-Sockets)

### BNC / MHV Cable

These cables fit to the single ended type BNC and MHV Feedthroughs. The cable is made from 50 Kapton Wire. N.B. the BNC and MHV feedthroughs and sockets do not have fixed impedance.

### - BNC Cables and Sockets

Please ask for data sheet -

### BNC UHV Cable

Insulation PTFE  
Contact Gold plated Cu alloy  
Housing Nickel plated Zinc  
Connection Crimp /Crimp  
Impedance 50 Ω

### Triaxial

Second shield around 50 Ω Coax cable, no contact to connectors. Fixed with crimp ferrules on both ends

### Sub-D Ribbon Cables

Sub-D cables are available with HV, UHV (=Ceramic) or PEEK Sockets and Kapton Ribbon cable . Cables have a female socket (to fit the feedthrough) and an open cable end. Other cable types, including male plugs, are available on request.

The cables shown opposite are 0.5m. Extra lengths are available to order with prices per extra 0.5m as follows.

9 Way € 40,00  
5 Way € 59,00  
25 Way € 84,00

## UHV Fibre Optic Components

Cinquepascal multimode step index silica-silica fibres have a pure silica core and doped silica cladding. The outer coating is a copper alloy which is UHV compatible and solderable. The UV grade (high OH type) will transmit light from 180 to 1200nm. The IR grade (low OH type) will transmit light from 500- 2600nm. They have very low fluorescence and are recommended for spectroscopy.

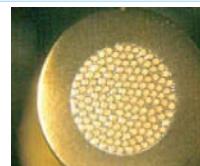

Cinquepascal Optical Fibres are offered as 300, 600 and 900 mm lengths terminating at one end with a special UHV compatible F-SMA coupler while the other end is polished and terminated with a metal ferrule. The standard core diameter is 600 microns. 200 and 400 microns are available to order.

**Compatible Vacuum Feedthroughs on CF and KF vacuum flanges are offered.**

Type	UHV FIBRE OPTIC CABLE, F-SMA / POLISHED END	Length	Core Ø µm	Part Number	Euro

The environmental properties of Cinquepascal metal coated fibres mean fibre bundles can now be used in vacuum applications. The thin metal coating ensures a good packing fraction.

For special applications and custom made assemblies, please call the Sales Office.  
Fibre bundle soldered into a metal ferrule

## Fibre Optic Coupler Feedthrough

For High Vacuum applications the Fibre Optic Coupler Feedthrough is a cost effective alternative to the UHV version. The vacuum seal is made with a miniature O-ring on the vacuum side of the F-SMA Fibre Connector. Cinquepascal's Vacuum Compatible Optical Fibre is recommended.

UHV Fibre Optic Feedthrough and F-SMA Coupler

### UHV Optical Fibre

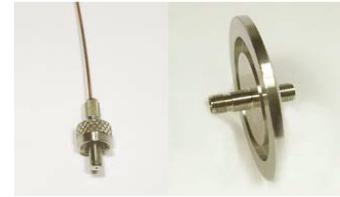

Vacuum:	UHV
Temperature:	-270°C bis 700°C
Fibre Type:	Step Index Multimode
Core:	High Purity Synthetic Silica
Cladding:	Doped Silica
Outer Coating:	Proprietary Cu Alloy
Minimum BendRadius:	100 x Fibre Ø
Typical Damping UV	248nm (KrF Laser) < 1.2dB/m
	308nm (XeCl Laser) < 0.26db/m
Typical Damping IR	1.06µm (YAG Laser) < 0.01dB/m
	Termination: Vacuum F-SMA / Polished end
Length:	300mm, 600mm, 900mm - Special lengths to order -
	Vacuum Feedthrough

### Vacuum Feedthrough

Vacuum:	UHV (CF Version)
Temperature:	200°C
Construction:	All Metal
Flange:	DN16CF, DN40CF
(High Vacuum Versions)	DN16KF or DN40KF
Terminations	
Vacuum	UHV-F-SMA
Air Side	Standard SMA
	Special types with several feedthroughs on one flange can be built to order.

### UHV Fibre Coupler

Fibre Coupler:	Double ended F-SMA
Construction:	Stainless Steel with Vent Holes
Length:	23.6 mm
Diameter:	6.35 mm

### Fibre Optic Coupler F/T

Vacuum range	10 <sup>-9</sup> mbar
Leak check	<1x10 <sup>-9</sup> mbar 1/s He
	Up to 4 feedthroughs can be mounted on one DN40 KF or CF flange.

## Quick Access Doors

Cinquepascal's QAD series offer unequalled ease of access to the Prep Chamber work area with maximum open diameter and maximum view diameter.

The DN160CF Quick Access Door has a work access diameter of 150mm, the optional viewport has a view diameter of 135mm.

An optional bakable micro-switch allows the door to be coupled into safety circuits to prevent for instance, incorrect and possibly hazardous valve opening.

160CF Load Lock System, CF160 Door with Viewport, CF160 Gate Valve, 600mm travel	640-LLS160-VP-600	POR	- 600mm Mag. Transporter
			- Manual Gate Valve
			- Quick Access Door with Viewport
			- 2 Additional Ports for Pressure Measurement and Gas Inlet

## FTM6 Digital Film Thickness Monitor

### Features & benefits

- Easy to read LED display of film thickness
- Memory storage for 2 deposition materials
- Automatic shutter control for reproducible film thickness termination
- Compact, space saving design

The FTM6 is an inexpensive film thickness monitor with high resolution and advanced features including shutter control for precise film thickness termination.

The compact size of the FTM6 makes it particularly suitable for use with small coating systems.

The FTM6 can be used as a free-standing instrument or mounted into control consoles using the panel mounting kit supplied.

### Display

Thickness display	0.0 nm - 999.9 µm
Resolution	0.1 nm
Display update rate	1 Hz

### Material parameters

Layers	1 or 2
Density	0.1 - 99.9 g cm <sup>-3</sup>
Thickness termination	0.0 nm - 999.9 µm
Tooling factor	0.01 - 99.9%

Sensor crystal operating range

5.1 - 6.1 MHz

Dimensions

110 mm wide

105 mm high

185 mm deep

Weight 1

1.6 kg

### FTM6 FILM THICKNESS MONITOR Part Number Euro

An oscillator and crystal holder are required with each FTM6 film thickness monitor.

FTM6 film thickness monitor E086-64-000 2779,00

## Universal Crystal Holder

The BOC Edwards crystal holder is suitable for most deposition processes and it operates effectively in an RF sputtering environment. Good thermal stability is achieved by water cooling

the crystal holder, which can also be baked up to 200 °C. The flexible water lines can be extended to allow easy positioning of the crystal head. The snap-in crystal enclosure makes crystal changing easy and quick.

The crystal holder has a standard NW25 leadthrough, and is ready for immediate installation without soldering, brazing or separate water connections.

### UNIVERSAL CRYSTAL HOLDER Part Number Euro

Oscillator, 3 m cable	E086-66-000	448,00
Crystal holder, includes pack of 5 crystals	E086-67-000	1376,00
Spare crystals (pack of 5)	E086-68-000	82,71

## FTM7 Digital Film Thickness Monitor

### Features & benefits

- Easy to read LED display of film thickness and deposition rate
- Memory storage for 11 deposition materials
- Dual crystal holder/dual shutter control facility
- Tooling factor and acoustic impedance error correction
- Auto-sequence mode for simplified multi-layer deposition
- RS232 interface

The FTM7 is a sophisticated, fully featured instrument for monitoring film thickness and deposition rate.

Up to 2 quartz crystal sensors can be connected to the FTM7, enabling two deposition sources to be sequentially monitored by separate sensors.

Built-in relays can be used to control up to two separate source shutters allowing deposition from two sources to be precisely terminated. A unique feature is the auto-sequence mode which simplifies multi-layer deposition by automatically selecting the next deposition material each time the Run button is selected.

The RS232 interface allows the FTM7 to be programmed by an external computer and can also output data during the deposition process.

### Display

Thickness display	0.0 nm - 999.9 µm
Rate display	0.0 - 999.9 n ms <sup>-1</sup>
Resolution	0.1 nm

### FTM7 FILM THICKNESS MONITOR Part Number Euro

At least one oscillator and crystal holder are required with each FTM7.

FTM7 film thickness monitor E086-69-000 4943,00

## UHV Thin Film Monitoring

The Film Thickness Monitor use a Quartz Crystal Oscillator to measure fine changes in mass as an evaporant builds up a thin film on a substrate. The Quartz Crystal is held in a water cooled holder in the beam of evaporated material. The Monitor Unit measures rate of deposition and film thickness.

Several different types of Crystal Heads area available for High vacuum and UHV use. We also offer complete packages with all necessary feedthroughs and cable.

### Measuring Head

Frequency	6MHz Quartz
Cooling	Water cooled
	option - no cooling
Max.Thickness	500 Å (Al)
Head Ø	30 mm
Length	adjustable from ca. 100-750 mm
Monitor Unit	710-STM-100MF
InputV	110/230V
Measurement Rate	4 per second
Resolution	0.1 Å/s
Outputs	4 Relays for Shutter Thickness Time Crystal Fail
Analogue-Output	0...10V (for Rate or Thickness)
Inputs	TTL Compatible Shutter open Shuter closed Null point Time Null point
Interface	RS232 Standard RS488 Option
Monitor Unit	710-STM-1B
Measurement-System	in compact housing, no display, communicates by RS232 / RS488 Interface, Oscillator is integrated, (USB Option), LABVIEW is necessary for operation of this device.
Measurement Rate	10 per second
Resolution	0.1 Å/s

The Complete Package includes all necessary parts, with exception of the Monitor 710-STM-100MF:

- Measuring Head
- In Vacuum Cable
- Feedthrough (BNC-Microdot + Water) on DN40CF
- Swagelock Couplers
- Oscillator
- External cable (3m)
- Spare Quartz Crystals

The "Complete Package for PC" includes the electronics but not Labview software.

### IN VACUUM MEASURING HEAD

Low Profile Quartz Crystal Sensor Head parallel to water lines, with 76 cm long Water Connections

### Part Number

### Euro

710-LPHS

576,00

Right Angle Quartz Crystal Sensor Head perpendicular to water lines, with 76 cm long Water Connections

### Part Number

### Euro

710-RAHS

671,00

### IN-VACUUM CABLE

In-Vacuum Cable 250 mm long

### Part Number

### Euro

710-IVC-250

128,00

In-Vacuum Cable 750 mm long

### Part Number

### Euro

710-IVC-750

137,00

### FEEDTHROUGHS

DN 400 Flange with 1 x BNC - Microdot Feedthrough and 2 Water Pipes

### Part Number

### Euro

710-BNC1-W2-C40

552,00

### SWAGELOCK CONNECTOR

Swagelock connectors for Water lines, 2 Pieces

### Part Number

### Euro

710-SW-32-48

69,00

### OSCILLATOR

Oscillator for 6 MHz Crystal

### Part Number

### Euro

710-OSC

268,00

Oscillator for 6 MHz Crystal, including BNC Vacuum Cable 15 cm + Air Cable 3 m and 5 Spare Quartz Crystals

### Part Number

### Euro

710-OSC-PACK

360,00

### FILM THICKNESS MONITOR UNIT

Film Thickness Monitor for 1 Head, with RS232 interface

### Part Number

### Euro

710-STM-100-MF

2034,00

### COMPLETE PACKAGE

Low Profile Sensor Head, In Vacuum Cable, DN40CF Feedthrough, Swagelock Connectors, Oscillator, BNC Cable, 5x Spare Crystal

### Part Number

### Euro

710-LP-PACK1

1459,00

Right Angle Sensor Head, In Vacuum Cable, DN40CF Feedthrough, Swagelock Connectors, Oscillator, BNC Cable, 5x Spare Crystal

### Part Number

### Euro

710-RA-PACK1

1566,00

### COMPLETE PACKAGE FOR PC

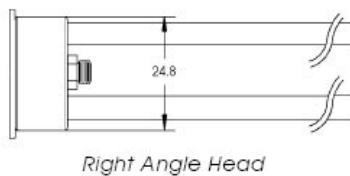

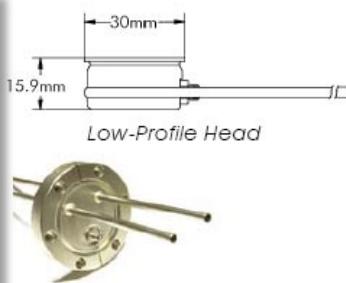

Low Profile Sensor Head, DN40CF Feedthrough, Swagelock Connectors, Oscillator, BNC Cable, 5x Spare Crystal, Monitor with RS232 Interface and Software

### Part Number

### Euro

710-LP-PACK-PC

1989,00

A variety of other models of heads area available including double and shuttered types.

**LABORATORY PRODUCTS**

- Vacuum pumps, water jet pumps, diaphragm pumps
- Flange Fittings, fluids, sealants and greases
- Vacuum systems valves
- Vacuum instrumentation
- Laboratory freeze dryers
- Vacuum ovens & dryers
- Special Vacuum Systems

It is difficult to imagine a more extensive range of applications than those involved in vacuum technology. Hardly a market sector exists which does not make use of a vacuum pump or a system which, to some extent, involves vacuum technology. Cinquepascal manufactures dedicated custom vacuum installations, small-scale laboratory freeze dryers and selected components.

Cinquepascal, which is the first SIT (Sistema Italiano di Taratura, Italian Calibration System) centre to receive low pressure accreditation, provides quality solutions in as short a time as possible, offering a rapid SIT calibration service, including vacuum instrument certification, to many industries. Non SIT calibrations are also carried out on the client's own premises.

Since 1999, Cinquepascal has been the sole distributor for BOC Edwards and for Research Centres and Universities throughout Italy, marketing vacuum components and instrumentation, providing service for BOC Edwards products and advice on vacuum technology.

Worldwide partners: Boc Edwards, ARS, Johnsen Ultravac, Ricor, LK Technologies, Organic Spintronics, Applied Surface Thecnologies.
